Climax terrace covering

Balance between aesthetics and simplicity

As terrace covering, pergola, greenhouse, veranda or conservatory, Climax® offers a wide variety of possibilities. Simple or complex, you name it ! Climax® has the right profiles at the right price. We deliver Climax® fully cut-to-size, including accessories and fixing materials. Limited mounting time, large spans between posts and solid profiles are inherent to the Climax® system.

Climax terrace covering

Climax stands for:

Aesthetics	rounded-off profiles with softline look
Quality	only high quality material in aluminium
Safety	a reliable supplier offering all technical support
Custom-made work	perfectly cut-to-size / prerubbered / premounted
Durability	lacquered aluminium is maintenance-free / lacquered according to Qualicoat norms
Guarantee	a 10-year guarantee
Quick deliveries	short delivery term
Colour	standard in white RAL 9010, RAL 7016 structure, other RAL colours and structured lacquer on request
Performances	span up to 7 meters between 2 posts

A new design and modern look are typical for Climax®. Rounded-off lines and soft forms give your system a sublime elegance. Your Climax® roof can perfectly be integrated in both modern and classic architecture. Climax® is available from stock in standard colours or with a short delivery term for RAL colours. A non-thermal or thermal roof, a roof between two walls, different types of gutters and posts, with or without integrated water outlet, with plastic sheets or glass panels, finish with rubbers, clips, different side finish profiles, inclinations from 5° over 45°, ... etc. Climax® offers a wide range of possibilities !

Climax Panorama terrace covering

Extend your horizon

The Climax® roof system offers the perfect solution to extend your house in a pergola, carport or terrace covering. Climax® is a self-supporting profile system cut-to-size and is easy to install. Available with polycarbonate sheets or with glass. The choice is yours ! Discover the largest possible span of 7 meter between two posts.

Climax Panorama terrace covering

The Climax® Panorama is the premium product in the spectrum of Climax®. The gutter and gutter rafter come in 1 profile and are the solid basis to make [spans up to 7 meter](#) (= length of a full profile) between two posts. This aluminium profile is the only one of its kind. Enjoy the magnificent panoramic view !

A sharp eye for detail

The profiles are rounded-off and have a softline look. A LED stripe can be integrated in the gutter. These LED lights give out a pleasant and uniform light.
