

# C70 Gold System Specification

**KÖMMERLING®**

# C70 Gold System Specification

- 1 Five chambered system is more energy efficient than the 3 chambered designs from many of our competitors.
- 2 Low line gaskets and weatherseals provide lasting performance and slimmer sightlines.
- 3 The full depth, central eurogroove helps make the windows and doors more secure.
- 4 Steel reinforcement is used where needed, to add additional structural strength.
- 5 The chamfered design of C70 Gold gives a modern and clean look through the frame, sash and glazing bead.
- 6 Single leg glazing bead is highly secure and easy to install on site.
- 7 Slimline sash is highly energy efficient due to its unique 5 chambered and low sightline design.

Now available in over 40 colours.

## ► Innovation and Energy Efficiency

Like all of our window and door systems, C70 Gold is packed with innovative product features. The 5-chambered design is far more energy efficient than the 3 chambered designs of yesteryear, resulting in more cost effective glass options for fabricators, installers and specifiers. With Building Regulations planned to change again in 2013, our PVCu window and door systems will lead the way.

Like all of our window and door products, our C70 Gold systems are packed with innovative product features. Kömmerling and parent company, Profine Group, also lead the way across Europe with their lead-free Greenline compound that was developed 7 years ago. In the UK many Systems Companies still use lead as a stabiliser in their PVCu compound. At Profine, we understand the importance of the environment in terms of harmful materials and energy efficiency.
